Notice regarding Payload Service Agreement with Magna Petra

ispace inc. (“ispace”) hereby announces that it has been resolved by the Board of Directors on October 4, 2025, that its consolidated subsidiary in Luxembourg, ispace EUROPE S.A. (“ispace EUROPE”), signed a payload service agreement (“PSA”) with Magna Petra Corp (“Magna Petra”), the first lunar resources company engaged in the prospecting, extraction and return to earth of helium-3 isotopes from the lunar surface.

1. Overview of the company to enter into the PSA

(1) Name	Magna Petra Corp	
(2) Location	8 The Green, Suite B, Dover, DE 19901, U.S.A.	
(3) Representative	Jeffrey Max, CEO	
(4) Description of business	A lunar resources company engaged in the commercialization of helium-3 isotopes from the lunar surface	
(5) Year of establishment		
(6) Relationship with the Company	Capital relationship	Not applicable
	Personal relationship	Not applicable
	Business relationship	Memorandum of understanding as a predecessor to this PSA
	Status as a related party	Not applicable

Note: Certain items, including the amount of capital, major shareholders and ownership ratios are undisclosed as Magna Petra is a private company.

2. Overview of the PSA

ispace provides payload services to transport customers’ cargo, called payloads, to the Moon using landers or rovers developed by ispace. The service includes technical advice and adjustments to carry customers’ payloads on our landers and rovers, which starts one to two years from the launch timing, experiments after landing, and providing services in relation to data communications etc. occurring alongside those activities, in addition to transporting payloads to the Moon by our landers and rovers using external vendors’ rockets. Fundamentally, one landing and exploration on the lunar surface by one lander is considered one mission, and we generally operate our business on a mission-by-mission

basis. This PSA assumes that the payload would be launched as part of our Mission 3 (Team Draper Commercial Mission 1).

As mentioned in [our press release on December 10, 2024](#), ispace and Magna Petra signed a memorandum of understanding related to future resources exploration to the Moon's surface. After continuous discussion between both parties, we determined to enter into the final agreement, PSA.

3. Overview of the contract schedule

(1) Payload	Mass Spectrometer Observing Lunar Operations
(2) Total contract amount	22 million USD
(3) Date of Resolution at Board of Directors meeting	October 4, 2025
(4) Execution date of the contract	October 4, 2025

4. Impact on financial results

This matter has already been factored into the consolidated earnings forecast for the fiscal year ending March 31, 2026, and ispace will promptly announce if it is determined that there are any matters that require disclosure.
